

Bonus: where is

Synthetic event
Gets recycled

```
<Input onChange={e => {  
  setStep(prev => prev + e.target.value);  
}})/>
```

Runs during
next render

Solution

```
<Input onChange={e => {  
  const value = e.target.value;  
  
  setStep(prev => prev + value);  
}}) />
```
