When will React re-render?

```
const MyComp = () => {
  const [counter, setCounter] = useState(0);

  const onClick = () => {
    setCounter(prev => prev + 1); // queue update
    setCounter(prev => prev + 1); // queue update
  } // re-renders

  return <button onClick={onClick}>Click me</button>
}
```

What about this?

```javascript
const MyComp = () => {
  const [counter, setCounter] = useState(0);

  const onClick = async () => {
    await fetch('something');

    setCounter(prev => prev + 1);
    setCounter(prev => prev + 1);
  }

  return <button onClick={onClick}>Click me</button>
}
```
